### **FROM “INSPECTA” TO COLD CHAIN TRACEABILITY: ANTARES VISION GROUP TO PRESENT NEW LIFE SCIENCE SOLUTIONS AT PHARMINTECH 2025**

*At the Group's booth (Pavilion 2 – Stand B41), visitors will also have the opportunity to experience the latest technology innovations for the Cosmetics sector.*

Travagliato (Brescia), April 14, 2025 – Strengthening its role as a key player in the Life Science sector with full-stack solutions for L1–L4 traceability and automatic inspection machines for primary packaging. This is the goal of Antares Vision Group (an Italian multinational leader in traceability and quality control, ensuring product safety and supply chain transparency through integrated data management) as it participates in Pharmintech 2025 (May 27–30, 2025, Fiera Milano), the exhibition dedicated to the Life Science industry where technological innovation, digitalization, and sustainability come together in a major international event.

With a complete, scalable, and modular portfolio, Antares Vision Group meets both the high-volume needs of complex production and the flexibility required by small batches. Its solutions respond effectively to new legislative demands related to Italy's compliance with the Falsified Medicines Directive (FMD), aligning the entire pharmaceutical supply chain—from Marketing Authorization Holders (MAHs) to manufacturers (including contract manufacturers) and importers—with the European system. Antares Vision Group's compliance solutions are deployed worldwide across all regulated markets. Hardware technologies can be installed in-line as standalone machines or integrated into existing production lines.

*“With our presence at Pharmintech” says **Gianfranco Landolfi, General Manager Life Science & Cosmetics at Antares Vision Group**, “we aim to reinforce our leadership in the Pharma and Cosmetics markets with solutions for inspection, traceability, and product/supply chain digitalization. Our offering continuously evolves to meet sector developments, and our stand will showcase our newest technologies firsthand. Our experts are ready to engage with pharmaceutical and cosmetic professionals to build customized solutions that ensure safety, traceability, consumer protection, and brand security.”*

At the heart of the Group's offering is DIAMIND, the modular, integrated ecosystem of solutions that connects technologies and enables a data-driven path to digital innovation, delivering transparency, efficiency, and regulatory compliance.

Visitors to the Antares Vision Group stand will get a first look at:

- **INSPECTA**, the new software suite for quality control management using smart cameras and sensors by Antares Vision Group, offering full modularity and customization of inspections, with scalable architecture to meet future needs.

## **PRESS RELEASE**

- The next-generation Pin Hole Control system, paired with Blister Filling Control AI, for 100% verification of blister forming and filling operations.
- An automatic inspection machine for pre-filled syringes (PFS), delivering unmatched accuracy—ranging from high-voltage integrity checks to AI-powered needle shield inspection—at speeds of up to 400 pieces per minute.
- Print & Check AIO, the only “All-In-One” solution on the market that combines serialization, weight check, labeling, laser printing, and tamper-evident application in a compact footprint. The AIO will also feature Smart Clearance, a proprietary AI-based system that automates line clearance operations before every new batch.
- A Level 4 traceability solution, designed to manage compliance for pharmaceutical brand owners and their business partners—from serial number management to communication with national and European systems.
- A Cold Chain traceability system, ensuring the integrity of the cold chain—essential for the proper preservation of biological drugs and vaccines, which are increasingly critical in the healthcare industry.

Antares Vision Group also reaffirms its focus on the cosmetics sector, offering both traceability and quality control inspection solutions. Now complemented by DIAMIND Connect, the new modular and scalable platform for supply chain data management. The software provides full traceability, transparency, and customer engagement—supporting anti-counterfeiting efforts and sustainability. DIAMIND Connect is already compliant with Digital Product Passport requirements and integrates with existing IT infrastructures, offering customized solutions for each sector. For cosmetic companies in particular, DIAMIND Connect ensures raw material tracking and compliance with safety standards.

### **ABOUT ANTARES VISION GROUP**

Antares Vision Group is the Italian multinational company that ensures product safety and supply chain transparency thanks to innovative technologies for quality control (inspection systems and machines), end-to-end traceability (serialization and aggregation solutions) and integrated data management (powered by artificial intelligence and integrated with blockchain). This is possible through DIAMIND, the integrated, modular ecosystem of solutions that guides the path toward digital transformation of companies, products and supply chains, to improve security and transparency in supply chains. The Group operates in the Life Science (pharmaceuticals, biomedical devices and hospitals), Cosmetics and FMCG (*Fast-Moving Consumer Goods*) sectors, supporting companies in digitalizing processes to improve sustainability, efficiency, productivity and visibility. It is a world leader in drug traceability, supplying the world's leading manufacturers (more than 50% of the top 20 multinationals) and numerous government authorities. It is present in more than 60 countries, employs more than 1,200 people and has a network of more than 40 international partners. The Company has been listed on the Euronext STAR Milan segment (EXM, AV:IM) since 2021 and reported revenues of €214 million in 2023, up 7% from 2022.
